Scan to MyPC?

Super easy solution for HP Workpath MFP

Scan to MyPC is a dedicated scan solution for HP Workpath MFP,
allowing you to complete the scanning process with just three touches and no additional setup.

Scan to MyPC Components

Scan to MyPC consists of an MFP application and a PC client.

MFP Application

An application installed on the multifunction printer (MFP) that allows users to select the destination PC and scan options.

PC Client

A program installed on the PC that receives and saves scanned files.

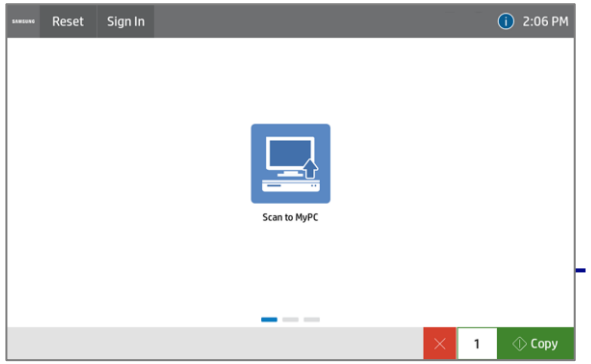

Users can preconfigure scan settings, including file formats like PDF, JPEG, TIFF, and XPS, without accessing the MFP directly.

MFP Application

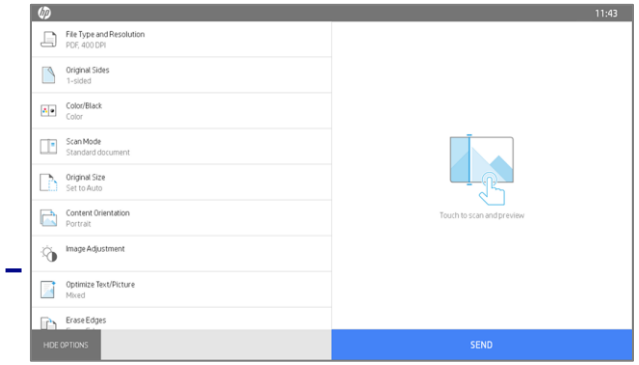

You can complete the scan and send the file to your PC with just three screen touches.

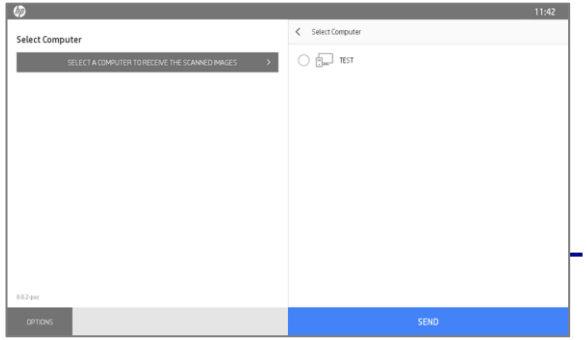

Home Screen

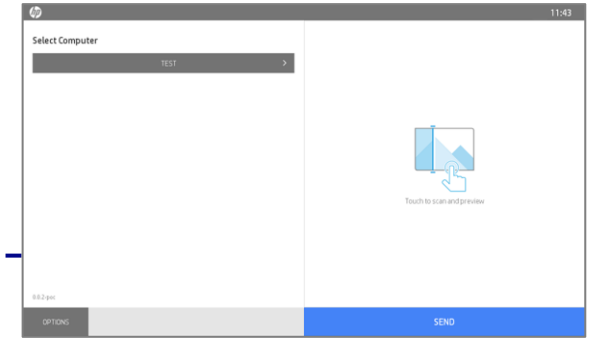

Scan Option

Select User's PC

After Select User PC

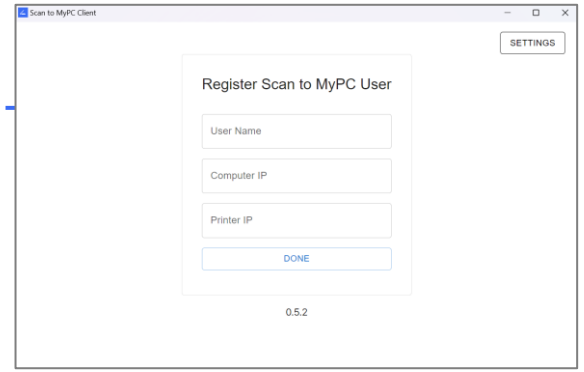

PC Client (User Program)

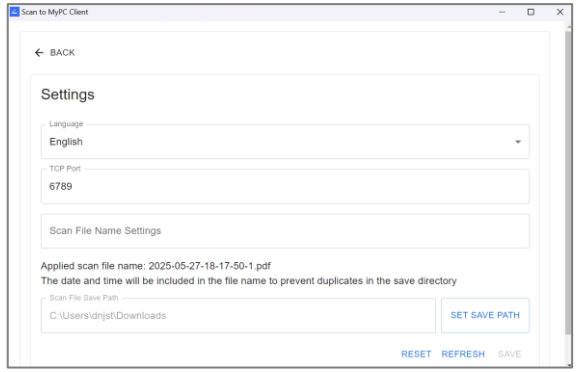

Allows users to configure the save location and filename for scanned files, as well as set scan options such as file format.
(* Supported formats: PDF, JPEG, XPS, TIFF)
